

To help compliance officers and/or the DPO in the management of the register of processing operations and in the performance of daily tasks, Actecil has developed an ergonomic tool in accordance with the GDPR that allows you to plan, manage, control and document your compliance activities.

**APM integrates all the functionalities to correctly perform your obligations.** It is a multilingual tool that can be customised and adapted to your organisation. It saves you time while ensuring seamless traceability and enabling remote maintenance.

## Main Features

**Management of risk analyses by rating processing operations**, assessing the level of risk and the measures to be taken accordingly.

**Management of Privacy Impact Assessments (PIAs)** with recommendations for actions to be taken according to the level of risk.

**Compliance diagnostics and audits for a quick assessment** of the level of compliance of processing operations.

**The dashboard** will give you an overview of processing and tasks.

Process **inventory** with quick identification and detailed description.

**Data breach management** with automatic alerts and real-time information.

**Clear and simplified histogram** to know the maturity level of the organisation.

### Compliance management

- Inventory and mapping of treatments
- Activity logging and reporting
- Data breach management
- Task management

### Risk management

- Etudes d'impact sur la Vie Privée (EIVP)
- Evaluation du niveau de risques
- Privacy By Design
- Diagnostics et audits de conformité

APM is an ergonomic, collaborative and educational tool that allows you to extract and/or print your activity report or your treatment record in different formats in a single click.

For ease of use, you can create multiple profiles and track access requests with the task manager.
