

Implementing and maintaining compliance with the GDPR is part of a continuous improvement process. This requires specific and tailored **actions that can affect the data controller, its employees and its partners.**

In order for companies to comply with the Regulation **autonomously**, having all documentation and processes up to date, ActeCil has developed a SaaS solution that offers any subscriber the corresponding documentation package. By answering a few questions and in a few clicks, get all the elements of compliance that will be useful and specific to your business sector.

Compliance management

The **questionnaires** will allow you to access templates for compliance documents.

Risk management

The **Box** allows you to establish a standard level of compliance and security for your organisation.

With regular updates, you can be sure to have a level of compliance that takes into account all legislative specificities.

Main Features

- Risk management
- Management of treatment compliance
- GDPR documentation management
- Employee management
- Subcontractor management
- Organisational risk and security management

BB Compliance is an easy-to-use tool that covers all the key points of compliance. It will allow any employer to autonomously manage their compliance thanks to a complete traceability and all the necessary documents and procedures provided.
